

From Concept to Cohort: Your End-to-End Partner Custom Model Creation and Contract Breeding

Every breakthrough begins with the right model. Inotiv leverages advanced genetic engineering expertise to develop custom models tailored to your specific research project.

HOW IT WORKS

COMPREHENSIVE CONTRACT BREEDING AND MANAGEMENT

Once proven, we provide the infrastructure to scale up your research model, streamlining the transition from model development to cohort production without multiple vendors. Our expert project managers oversee:

- **Colony Management:** Optimized breeding schemes to meet your cohort requirements.
- **Quality Assurance:** Rigorous genotyping and continuous health monitoring.
- **Animal Welfare:** Full integration of enrichment protocols, upholding the 3Rs.
- **Teklad Diet:** Standard or Custom diet for preconditioning, aging and dosing.

INTEGRATED SERVICES

Leverage our full suite of supporting services, all managed by your dedicated Inotiv team:

Why Partner with Inotiv?

By consolidating model creation, breeding, and specialized scientific services, Inotiv reduces environmental variability and project complexity. Let us handle logistics so you can focus on the science that matters.
