

NEW! Teklad Ultrasoft Bedding

Teklad 7094

Teklad 7094 Ultrasoft Bedding is the newest in our line of cellulose bedding products. Ultrasoft is a popular choice for laboratory rodents. It is made from renewable resources, making it a more environmentally friendly option. Ultrasoft is a lofty soft bedding material that is highly absorbent, thereby helping to control moisture and other odor levels within each cage. This bedding is easy to handle and distribute, allowing for more efficiencies during cage changes and reducing stress on the animals.

PRODUCT FEATURES AND BENEFITS

- Highly absorbent thereby reducing ammonia levels
- Encourages natural behaviors for nesting and burrowing
- Enhances environmental enrichment
- Maintains a clean and dry environment
- Reduces allergens due to low dust levels
- Sustainable and renewable
