

ABOUT

Judit E. Markovits, DVM, Ph.D., DACVP, Fellow IATP

Distinguished Pathologist

Judit E. Markovits joined Inotiv in January 2018 as a senior/distinguished pathologist. With over 30 years of experience, she brings industry-leading technical expertise and is an asset to Inotiv's pathology services.

Dr. Markovits earned her DVM degree from the University of Veterinary Science in Hungary and received her Ph.D. in veterinary pathology from Louisiana State University. Her first job after graduate school was at the California Primate Research Center at UC Davis. Judit started her career in industry as a postdoctoral fellow in gastroenterology at Procter & Gamble. Following her postdoctoral position, she worked at Novartis for over 20 years first in project pathology (also serving as strategic pathologist for oncology), then as director of discovery and investigative pathology. Following Novartis, Dr. Markovits returned to academia and established a pathology group at Houston Methodist Research Institute.

~30 Years of Experience

Areas of Expertise

- > Animal Models of Disease: chronic kidney disease, IBD, RA/QA
- > GI and Liver Diseases
- > Non-human primates
- > Peer review
- > Small and Large Molecules
- > Discovery & Full Phase Development
- > Trouble Shooting/De-Risking

My Jam

- > Music
- > Fine Art
- > Outdoors
- > Animal Behavior
- > Reading
